Gustavo Lopez

Senior Full-Stack Developer

Córdoba, Argentina | gml.gustavoml@gmail.com

Portfolio • GitHub • LinkedIn

Summary

Senior Full-Stack Developer **with over 15 years** of industry experience.

I've worked across different tech stacks, combining various technologies, languages, and frameworks.

I hold a **Microsoft** certification (JavaScript, HTML5 & CSS3) and will be getting my **AWS** certification next year (2027).

I truly believe that people are the most important part of a project. Because of that, a healthy environment, mutual respect, and common sense are highly valuable to me.

Right now, I'm focused on building projects with the help of AI, understanding the world around big data and data engineering, and diving deep into getting my next certification (AWS).

Education & Certifications

Systems Analyst | Instituto Superior Santo Domingo (ISSD) *(2001 – 2006)*

Microsoft Certified Professional (MCP)
Programming in HTML5 with JavaScript and CSS3 Specialist *(Exam 480)*
(see certifications)

Experience

Nybble Group ***Senior Full-Stack Developer***

May 2024 – Jun 2026

Corporate Financial & Stock Management Platform:

- Built and maintained a full-stack web application for employee stock ownership plans, retirement accounts (401k, Profit Sharing), and vesting schedules using **Meteor**, **Node.js**, and **Blaze**.
- Handled bulk data imports, financial growth calculations, and reporting features backed by **MongoDB**.
- Automated version control, releases, and workflow pipelines using **GitHub Actions**.

Enterprise Life Settlements & Policy Servicing Backend:

- Migrated backend services from Java 1.8 to **Java 17 with Spring Boot** to modernize the system and improve performance.
- Integrated **Camunda** for process workflows and **Azure OCR** to automatically read text from PDFs and scanned documents.
- Managed cloud infrastructure on **AWS (RDS, S3, CloudWatch)** and ran containerized environments with **Docker** on EC2.
- Built frontend features using **Angular** and worked with **Atlassian Jira**, **GitHub**, and **Maven** inside **IntelliJ**.
- **Adopted AI-driven development workflows** (using **GitHub Copilot**, **Cursor**, and **Claude Code**), shifting toward a model where AI handled the primary coding while we focused on reviewing, testing, and guiding the logic.

Angular - Java - Node - TypeScript - Claude Code - AWS - Cursor

ITLG ***Senior React Developer***

Jan 2023 – Dec 2023

Banking Sector:

- Worked on building and improving core banking applications used to manage business loans, credit approvals, and interest rates.
- Built, migrated, and integrated **Micro Frontends (MFEs)** into the main banking platform, keeping modules independent and clean.
- Developed multi-screen user interfaces using **React**, **TypeScript**, and **Redux**, managing complex forms and global state.
- Connected frontend apps with backend services via **Axios**, working alongside **Java / Spring Boot** and **BFF** layers.
- Wrote unit tests to maintain solid code quality, keeping test coverage above 80%.
- Handled daily bug fixes, code maintenance, and deployments using **Jenkins**, **Argo**, **Kubernetes (GCP)**, **Bitbucket**, and **Jira** in an Agile team.

React - TypeScript - BFF - Redux - Axios - Java - Micro Frontends

Kalto ***Senior React Developer***

Nov 2021 – Nov 2022

B2B Fintech Platform:

- Developed financial management and payment processing features for a B2B fintech platform, ensuring clean and responsive layouts for laptops and tablets using **React**, **TypeScript**, **Redux**, and **Bootstrap**.
- Connected frontend interfaces with **Node.js** and **GraphQL** backend services to handle secure data flow and transactions.
- Implemented unit and integration testing practices to support application reliability and maintainability.

React - Redux - TypeScript - JavaScript - UT (Jest) - Node.JS - Bootstrap - GraphQL

Ohana ***React Native Developer***

Aug 2021 – Oct 2021

Mobile Fintech Features:

- Developed core mobile features including payments, transfers, purchases, and account management capabilities using **React Native**, **TypeScript**, **HTML**, and **CSS**.
- Built accurate user interfaces from **Figma** designs following a pixel-to-pixel approach, collaborating closely with the mobile team.

HTML - CSS - TypeScript - Figma (pixel-to-pixel) - React Native

Cognizant Softvision ***React Developer***

Feb 2021 – Jul 2021

Pharmaceutical Digital Platform (GSK Project):

- Developed and maintained frontend features for digital web applications in the pharmaceutical industry, building modern user interfaces using **React**, **TypeScript**, **JavaScript**, and **Redux**.
- Connected web applications with backend services and APIs, ensuring reliable data flow and smooth user experiences across multi-screen workflows.
- Collaborated within multidisciplinary product teams following agile methodologies, and participated in internal tech communities to share knowledge and maintain high code quality standards.

Multi-screen - JavaScript - Hooks - React - TypeScript - Design

McAfee ***Angular Developer***

Oct 2019 – Jan 2021

- Developed core dashboard components for enterprise cybersecurity products, improving user tracking, log management, and real-time data visualization.

Angular - ElectronJS - JavaScript - Node.js - HTML - TypeScript - Jest

DXC Technology ***Full-Stack Developer***

Sep 2018 – Sep 2019

- Implemented enhancements and new functionality for a global music industry platform supporting artists, albums, and content management.
- Contributed to both front-end and back-end development using C#, ASP.NET, JavaScript, and related web technologies.

C# - CSS - ASP.Net - JavaScript - Bootstrap - HTML - jQuery

Bancor ***Full-Stack Developer***

Dec 2013 – Sep 2018

- Designed, maintained, and modernized banking systems, intranet platforms, and customer-facing applications.
- Delivered full-stack solutions using C#, .NET Framework, ASP.NET MVC, Entity Framework, SQL Server, and JavaScript.
- Maintained and enhanced business-critical banking applications and implemented new functionality across multiple banking products.

C# - Visual Fox - SQL Server - JavaScript - jQuery - Entity Framework - ASP.Net - CSS - MustacheJS - UnderscoreJS - RequiredJS - .NET MVC - .NET Web API - FoxPro - WPF / WCF

Additional Experience

Mystic Solutions Limited ***Freelance Developer***

`Aug 2012 – Oct 2016`

C# - .NET - SQL Server - JavaScript - .NET MVC - HTML - jQuery - CSS

Harriague + Asociados ***Senior Software Developer***

`Mar 2013 – Dec 2013`

MongoDB - .NET MVC - JavaScript - C# - -NET Web API

Globant ***Full-Stack Developer***

`Jul 2011 – Mar 2013`

.NET Razor - MVC - jQuery - JavaScript - C#

Particular ***Freelance Part-Time Developer***

`Sep 2011 – Dec 2011`

ASP.NET - ASP - JavaScript - C# - SQL Server

Bancor ***Full-Stack Developer***

`Jun 2008 – Jul 2011`

C# - SQL Server - JavaScript - .NET - Visual Fox - WPF / WCF - jQuery

Dicicom ***Full-Stack Developer***

`Jun 2007 – Jun 2008`

SQL Server - HTML - JavaScript - ASP.NET Web Forms - CSS - C#

Technical Stack & AI Tooling

Category	Technologies
Front-End	React, TypeScript, Angular, JavaScript (ES6+), HTML5, CSS3, Micro Frontends, Bootstrap, Tailwind CSS, Next.js, Astro
Back-End	Node.js, Express, C#, .NET, ASP.NET MVC, Entity Framework, Prisma, Java, Spring Boot
AI-Assisted Development	LLMs, Coding Agents, MCP, Harness Engineering, RAG
AI Development Tools	OpenCode, Claude, Cursor, GitHub Copilot, Gemini
DevOps & Infrastructure	AWS, Docker, CI/CD Pipelines, Git
Testing Frameworks	Jest, Cypress, Vitest, Playwright
Databases	SQL Server, MongoDB, MySQL, SQLite

Languages

Spanish: Native / Bilingual

English: Professional Working Proficiency
